

MRS WILKES' CLASS ACTIVITIES 13th to 17th July 2020

This week our class activities are based on **Mountains**.

Here are the activities that you should complete this week. Email your work/photographs of your work (please use your Hwb Email Account) to McKeeA1@hwbcymru.net You can send them at the end of each day once they're completed or on a Friday if it's easier.

I look forward to seeing how you're getting on!

Monday:

Let's start by looking at what a mountain is? Do you know? Research what a mountain is and look at how it is formed/made. You could draw a diagram and label it, or you could create a flow chart showing the different stages to show the information you have found.

Tuesday:

Using items you have in your house, this could be recycling or lego, anything, I want you to create a model of a mountain. Maybe research a famous mountain and try to recreate it. Send me lots of pictures of the process and then the final product.

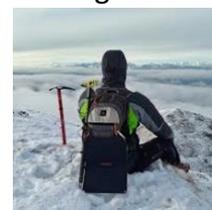

Wednesday:

There are lots of famous mountain ranges around the world, like The Alps, Andes and The Himalayas. I want you to show me where in the world different mountain ranges are found. I have put a blank world map on google classrooms or you can find one of your own to print out. I would like you to create a key and show me where the following mountain ranges are found. (Don't worry if you can't print maybe you can research each mountain range and find out some information on them.)

The Alps Andes The Himalayas Atlas Mountains Rocky Mountains
Brecon Beacons

Thursday:

Lots of people have been on mountain expeditions. These can sometimes be dangerous and scary expeditions that can last a long time. I would like you to research a famous mountain expedition. Once you have read about the things they did and saw I want you to imagine you are going on a mountain expedition. I want you to write 'A Day in the Life of' and describe everything you have to do in one day of you were on that mountain expedition. From the minute you get up to the minute you go to sleep. Try to include exciting vocabulary and make it interesting.

Friday:

Choose your favourite mountain range and sketch it. Remember sketching is light, we do not press our pencil down hard. You can decide whether you want your art to be left in black and white or whether you want to add colour onto it.

Other ideas:

If you have a printer at home there are lots of resources about Mountains to complete at www.twinkl.com

Don't forget:

Practise those TIMES TABLES over and over again. They're really important and the quicker you can recall the answers the easier Maths will become.

Join in with Joe Wicks' PE sessions every weekday at 9am on YouTube.

Talk with your mum/dad/brother/sister about anything that's worrying you.

ENJOY YOUR SUMMER!!!.

Stay safe everyone!

Mrs Wilkes
